

## CMC S Scholarship Report

Diana Ceja met with me and shared the website and details of the role and responsibilities for this job. Diana made changes to the site and updated the email address where scholarships/grant applications need to be submitted. We made minor changes to the wording of one the professional development scholarships, this did not change scholarship but made it more clear as to what funding could be used for.

One concern is the lack of applications being submitted. There have been very few submitted over the past few years and the ones we are receiving are submitted from primarily students attending one IHE. We need to increase the awareness of these grants and scholarships and encourage CMC members to apply. A recent blast went out to all CMC S members advertising and encouraging members to investigate these opportunities.

Thank you.
